Wikipedia article on the Python programming language!

`!1 `!5 `!12 open source `!13 `!8 that was made `!2 be easy-`!2-read `!6 powerful. A Dutch `!14 named Guido van Rossum made `!1 `!9 1991. He named `!11 after `!3 television show Monty `!1's Flying Circus. Many `!1 examples `!6 tutorials include jokes from `!3 show. `!1 `!5 `!12 interpreted `!8. Interpreted languages do not need `!2 be compiled `!2 run. A program called `!12 interpreter runs `!1 code on almost any kind `!7 computer. This means that `!4 `!14 can change `!3 code `!6 quickly see `!3 results. This also means `!1 `!5 slower than `!4 compiled `!8 like `!10, because `!11 `!5 not running machine code directly. `!1 `!5 `!4 good `!13 `!8 for beginners. It `!5 `!4 high-level `!8, which means `!4 `!14 can focus on what `!2 do instead `!7 how `!2 do `!11. Writing programs `!9 `!1 takes less time than `!9 some other languages.`!1 drew inspiration from other `!13 languages like `!10, `!10++, Java, Perl, `!6 Lisp. `!1's developers try `!2 avoid changing `!3 `!8 `!2 make `!11 better until they have `!4 lot `!7 things `!2 change. Also, they try not `!2 make small repairs, called patches, `!2 unimportant parts `!7 `!3 CPython reference implementation that would make `!11 faster. When speed `!5 important, `!4 `!1 `!14 can move some `!7 `!3 work `!7 `!3 program `!2 other parts written `!9 `!13 languages like `!10 or PyPy, `!4 just-`!9-time compiler. It translates `!4 `!1 script into `!10 `!6 makes direct `!10-level API calls into `!3 `!1 interpreter. Keeping `!1 fun `!2 use `!5 `!12 important goal `!7 `!1 �s developers. It reflects `!9 `!3 `!8's name, `!4 tribute `!2 `!3 British comedy group Monty `!1. On occasions, they are playful approaches `!2 tutorials `!6 reference materials, such as referring `!2 spam `!6 eggs instead `!7 `!3 standard foo `!6 bar.
